(54) Title: A UTILITY PORTAL

(57) Abstract: A utility portal, including - a frame including a base plate and at least one side which extends substantially orthog-  
onally from an outer peripheral edge or edges of the base plate - a cover engageable with the frame; wherein said frame can in  
use be raised from a first position substantially below a new surface plane to a second position to align with the new surface plane  
substantially without disturbance to an existing surface adjacent to the frame.
